

## BagFilter® Pipet Patented

Lateral filter bag for lab blender with easy pipet access

Ref. 111 710 (400 mL)

Standards:

Manufactured under:

**BagFilter® Pipet** is a blender bag with a lateral non-woven filter for all microbiological analyses. A reclosable sticker allows easy pipetting with a micropipette cone. Cross contamination risks are reduced with pipet cones for pathogens pre-enrichment bags. The lower pipetting height makes it easy to work, preventing Musculoskeletal Disorders. The filtration is instantaneous without cross-contamination.

### TECHNICAL SPECIFICATIONS

- Bag with lateral filter
- Ideal for multiple pipettings
- **Reclosable sticker for easy pipetting with a micropipette cone**
