

"BagMixer blenders
for all our analyses."

Isabelle BILLET, Laboratory Manager

JumboMix

BagMixer

MiniMix

Interscience equips the CHARAL group.

Isabelle BILLET, Laboratory Manager, Charal Group, Cholet, France

Charal is a leading producer of fresh meat and ready-made meals, supplying supermarkets and hypermarkets. The group employs 3.000 people, and the quality department carries out more than 200.000 laboratory checks every year. The standards applied in our plants are 10 to 100 times higher than legal requirements.

"We do around 100 analyses a day, blending muscle, the raw material from carcasses, minced meat, charcuterie and ready meals. We use BagFilter filter bags with BagMixer blenders. We chose BagMixer because they have a number of very valuable advantages: the Click and Clean® paddles, which are removable and autoclavable, make it easy to clean the blending chamber and the paddles, which is hygienic and much more pleasant. The adjustable distance between the paddles and the door is also a major advantage. For environmental product testing, for example, the paddles are moved forward to adapt the mixing chamber to the nature and size of the sample. Last but not least, the robustness of the equipment, which comes with a 3-year warranty, is a key factor. We work with MiniMix for blending small samples, BagMixer for standard samples and JumboMix for large samples, up to 2000 ml. Our laboratory has 25 years' experience and is a pilot laboratory for all the company's laboratories."
